Remarks 6th July 1810

Fresh breezes & cloudy & large swell at 4 pm saw a part a Brig standing to the windward from the Southward upon discovery. Supposed it to be a British packet Bound to America yellow sides & black wales, Middle part very squally plenty of rain shower with abundance of thunder & plenty of lightning Latter part the same more moderate & pleasant, but during the whole 24 Hours much daily has been necessary to be in & much more to make sail which has been very closely attended to for the benefit of Dispatch

Remarks Monday 16th July 1810

Small winds & Rainy Weather. Fills
up the principal occurrences of the
past day; Wind, the fine cheerly
breeze that left us for a time, But
I hope it will not be long before it
returns again,

Remarks on Tuesday 17th July 1810

Flattering weather commencing this 24 Hours and moderate weather ends them; One of the most pleasant nights Almost ever discovered, our time exploring the Salt water Experience last night - a bright full moon at the extent of her orbit & considerable of clear sky, produced a very clear light - almost comparable with day light - with a small breze of Wind. Skiming on the top the water of a rolling swell over the interior appearance produced - Lat Obs 40. 30 N

Remarks on Thursday 19th July 1810

Through of this 24 Hours have been surrounded with variable winds and abundance of Squalls - more so than any time during the american Shore, and they oblig'd me to keep a vigilant look out. after the squalls were none of any great force, dark & cloudy

Remarks Saturday 21st July 1810

Light airs almost calm, but the Schooner mentioned yesterday still in sight has got directly to windward of us and approaches us with in 4 miles, at the moment every appearance dictated that She would in a very short time be alongside of us, Fortune favored us by a brisk breeze enable us to pass all sail and in three Hours We are entirely out of sight of her from off deck this is the second tryall we have had with this Vessel & from her general conduct I have no doubt but She is a French privateer — Middle & Latter part Squally with flurry of Rain Lat Obs 37. 56 N

Remarks on Friday Nov 2d 1810

Strong Breezes from the Westward
and Cloudy, at 5 PM the Pilot
came on board, and at half past five
Came to anchor in 3 fathom Water
at which time commenced Snowing and
during the Night thirty a very
Severe Gale of Wind with a very
Considerable Body of Snow
which rode out of the Small Bower
& 35 fathom Cable, We lay opposite
to the West Bank — The pilot never
came on board till We above the
Light House, and was preparing to go into
the Horse Shoe, and in 10 minutes after
passing the Light, the Snow shut the Light
in —
